

Free Water Saving Hose Nozzles

As part of our ongoing water quality and water conservation efforts, and in cooperation with South Coast Water District, OC Dana Point Harbor is pleased to provide complimentary water-saving hose nozzles to Boat Slip Licensees. Dana Point Harbor boaters can pick up a nozzle at the East & West Basin Marina offices. The nozzles are intended for use on the dock hoses and serve to reduce water flow while increasing water pressure. There is a limited supply which will be available on a first-come, first-serve basis, and only one will be given to each boater.

For additional information or questions,
please contact your Marina office:
