Deceased UCI student cause of death determined, investigation ongoing

SANTA ANA, Ca. (March 11, 2019) – The Orange County Sheriff's Department Coroner Division has determined an official cause of death for UCI student Noah Domingo, 18, of La Crescenta.

Domingo died on Jan. 12, 2019, at a home on Sycamore Creek in Irvine. His cause of death has been determined to be accidental acute ethanol intoxication. At the time of Domingo's death, estimated to be approximately 3:30 a.m., his blood alcohol level was detected to be approximately 0.331. Toxicology tests did not detect any additional substances in his system at the time of his death.

The Irvine Police Department is handling the investigation.

"The Irvine Police Department is actively investigating this case. At the conclusion of our investigation, we will present our findings to the District Attorney's Office, which will determine whether charges are warranted," said Irvine Police Department Lieutenant Mark Anderson.

We extend our deepest sympathies to the Domingo family for their loss.
